

Remote Mental Health

A unique approach to supporting your district

Services Delivered

SPG provides direct individual and group counseling services, consultation, parent support, compensatory services, and staff training.

Accessibility

Access for everyone no matter location, health status, or schedule. Removes barriers to therapy and increases ability to use items found within the natural environment.

Collaboration

Remote services allow for greater collaboration between caregivers and therapists. Observation of real-time therapy sessions leads to greater carryover of skills learned in therapy.

Support

SPG remote therapists are supported through direct clinical mentorship, ongoing teletherapy training, access to resources, materials and IT support.

Compliance

SPG Remote therapists can work with your team to ensure IEP compliance. We provide compensatory services, coverage for unexpected or scheduled leaves, as well as assessment support.

Want to learn more?

We would love to chat with you to share how we can serve your district and tailor our mental health services to best support your students, staff and families!
